Portfolio Site Plan & Wireframes

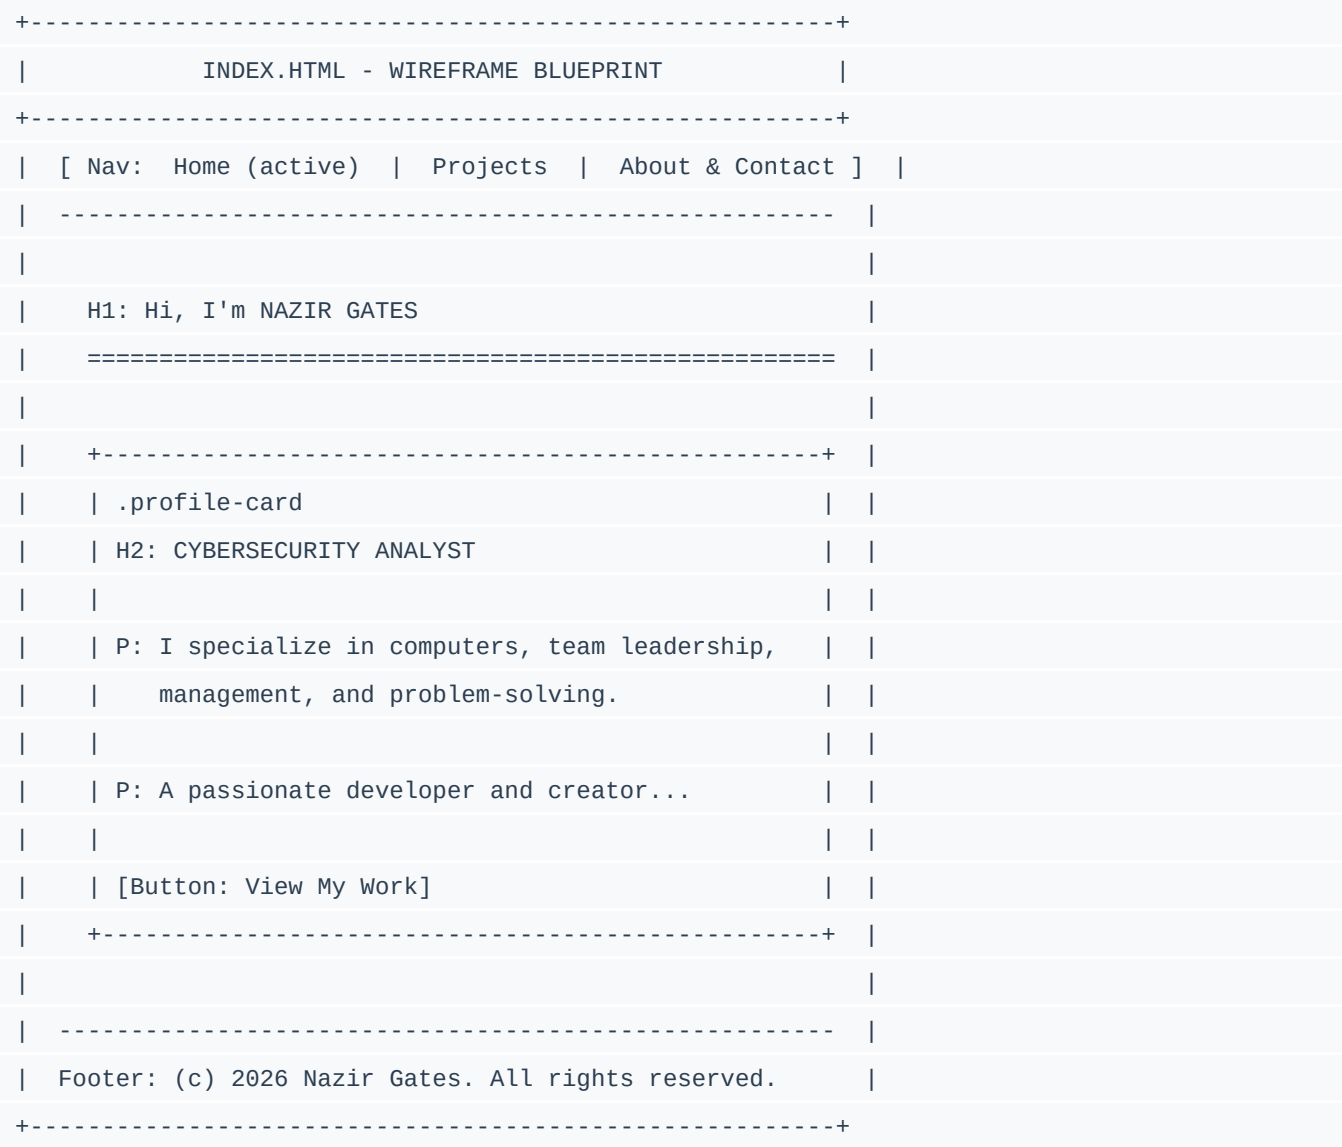
Student Name: Nazir Gates
Course: Web Development (A)
Assignment: Homework 2 Layout Documentation

1. Design Strategy & Specification

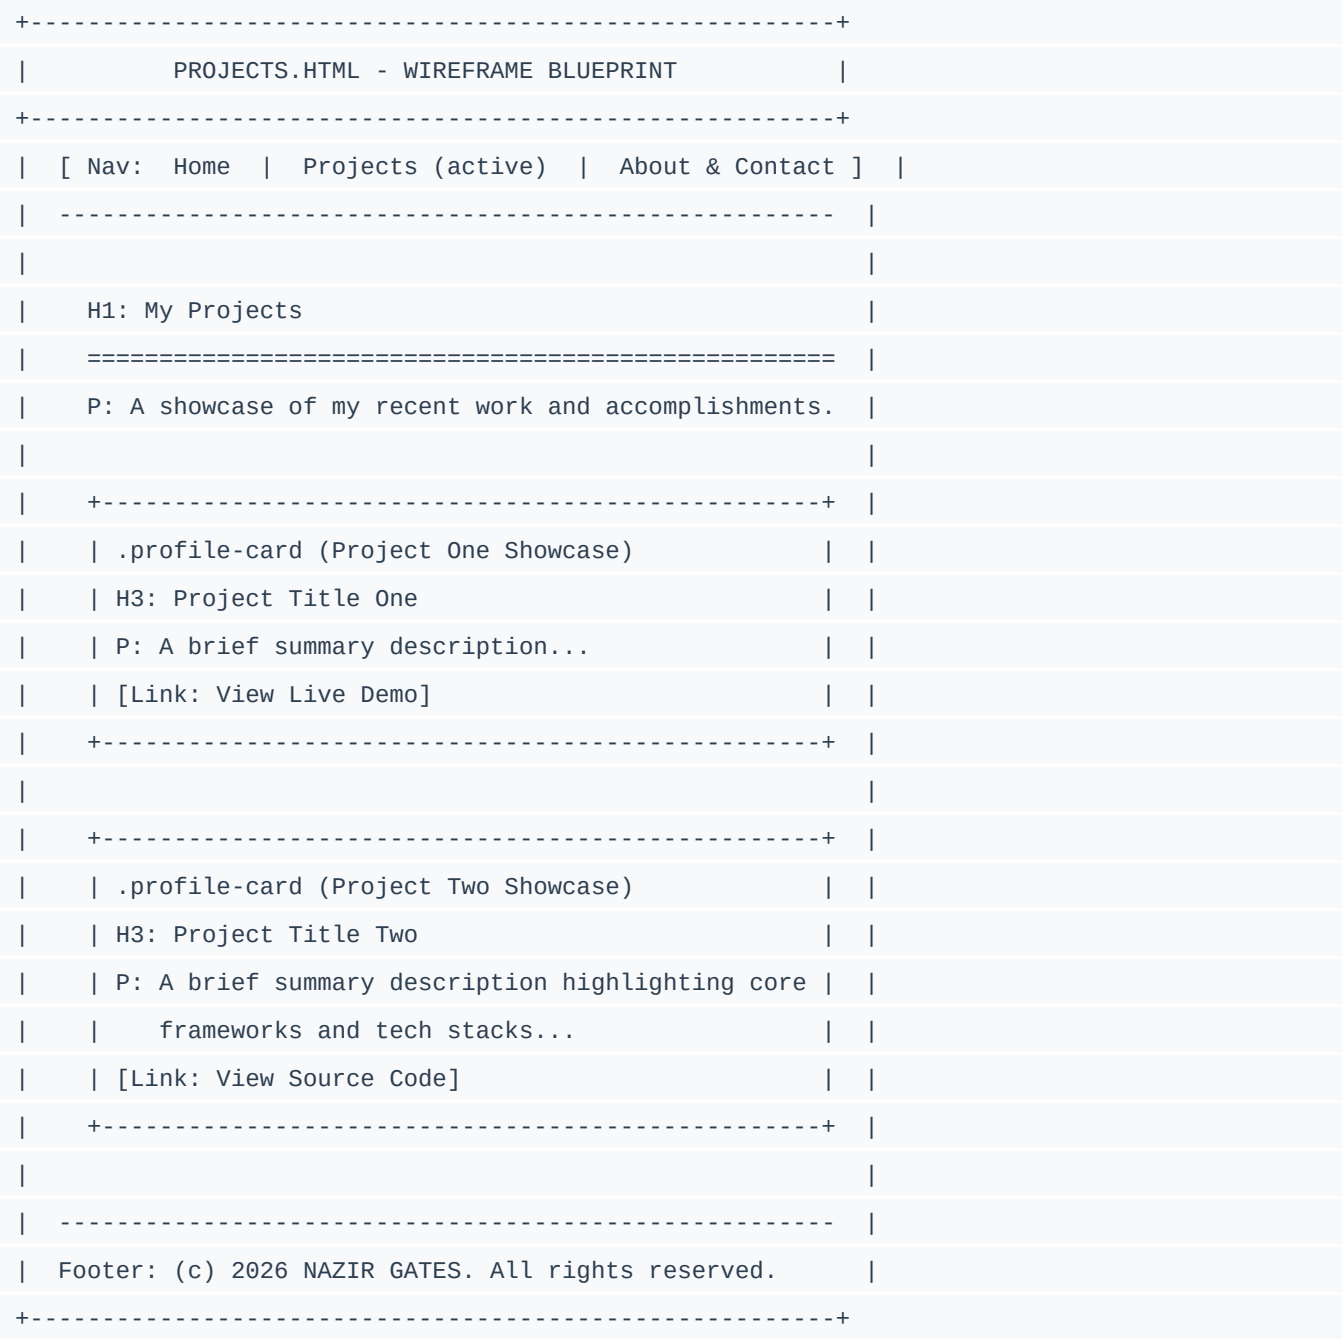
This document maps out the comprehensive visual structure, layout configuration, and typographical architecture for the professional personal portfolio application. The interface has been designed explicitly to establish a clean, highly scannable, and modern user environment tailored for a tech portfolio profile.

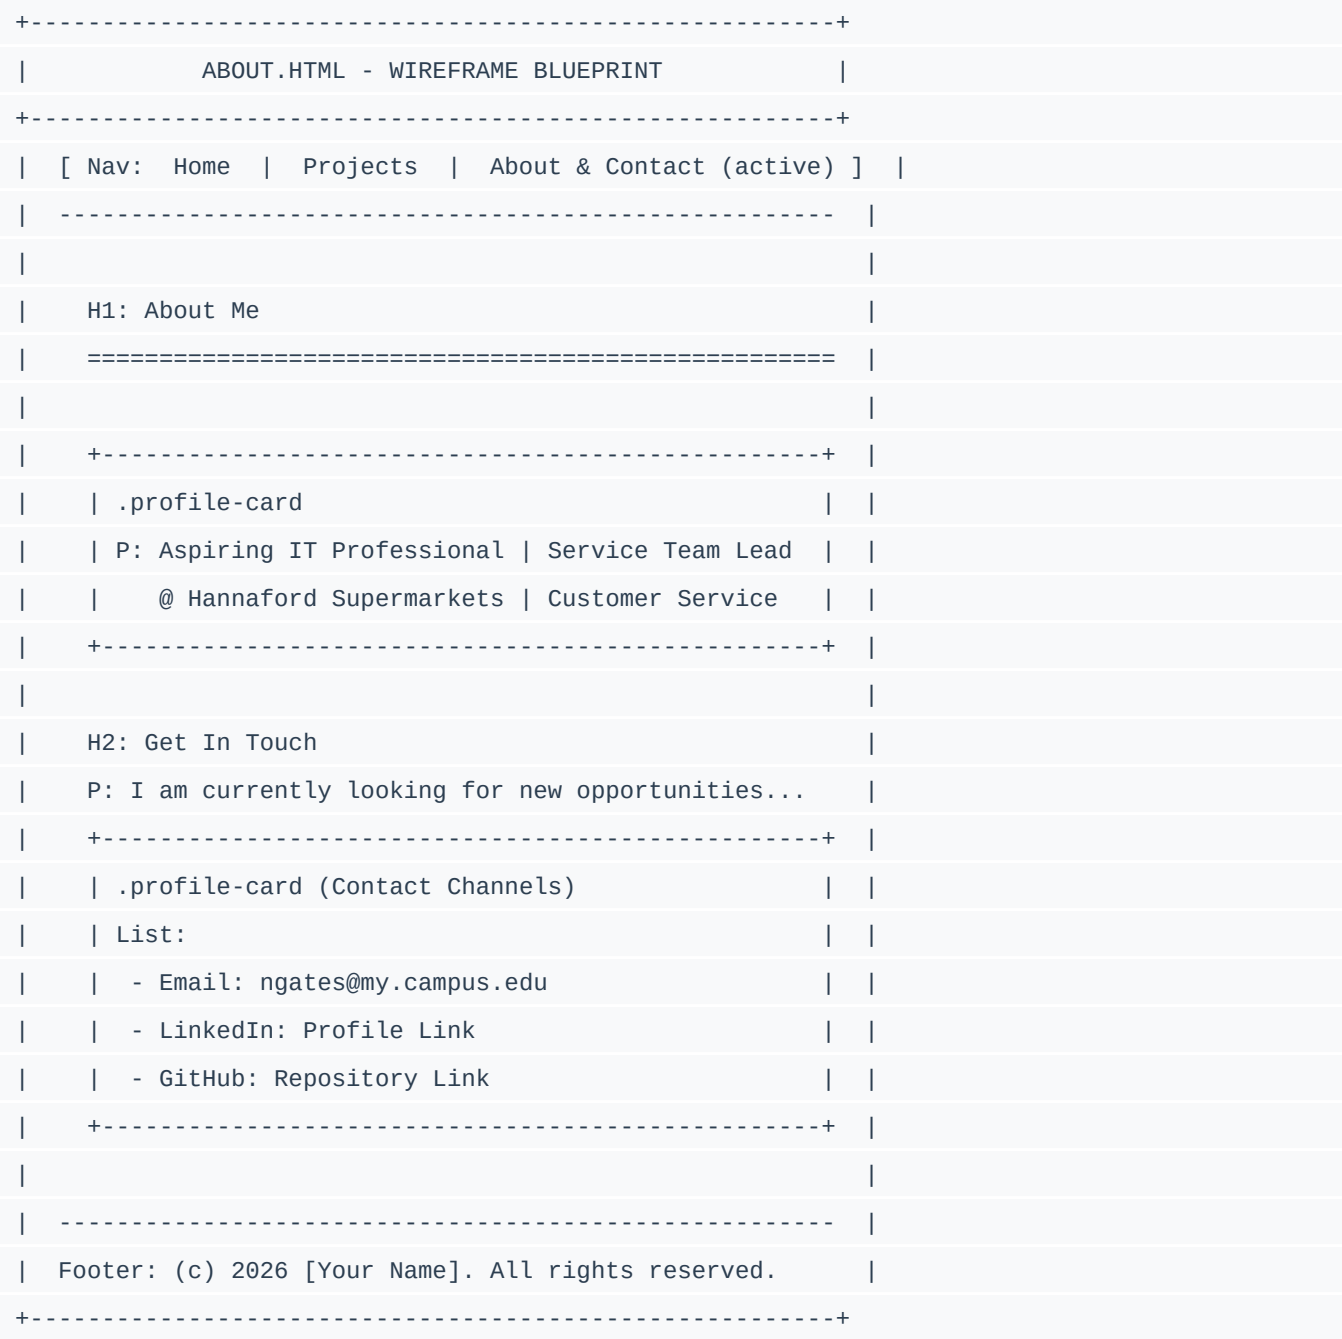
Design Variable	Target Choices & Hex Values	Role / Application
Primary Branding Color	**Teal (#16a085)**	Used for headings, main titles, core link states, and modular structural card accents.
Complementary Accent	**Warm Orange (#e67e22)**	Applied to critical UI calls-to-action, layout anchor lines, and link hover states.
Background Tier	Light Slate Teal (#f4f7f6)	Soft, low-contrast backdrop canvas that reduces eye strain and isolates structural viewports.
Structural Cards Canvas	Pure White (#ffffff)	Maintains crisp, clean card boundaries that pop naturally off the soft site background.
Typography Architecture	Segoe UI, Tahoma, Verdana	Clean sans-serif fonts to optimize textual hierarchy, readability, and modern aesthetic.

2. Page Layout Blueprint: Home Page (`index.html`)



3. Page Layout Blueprint: Projects Page (`projects.html`)





4. Page Layout Blueprint: About & Contact Page (`about.html`)
